

INSTALLATION/REMOVAL TOOL FOR NIGHT VISION CAMERA

Abstract of the Disclosure

An installation/removal tool is provided for a night vision camera. An elongated handle includes a tool head at one end having drive recesses that mate with drive lugs on a nut of the aiming assembly. The tool is a simple design that is incorporated in a retrofit or aftermarket night vision system kit for the end user and allows the nut to be easily turned without damage for installing/removing the camera to the aiming assembly.
